

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site is social proof through product reviews, but it is bleeding value because product pages show a 'Reviews' heading with no actual review content, ratings, or social proof, undermining purchase confidence and directly suppressing add-to-cart conversions.

#	Finding	Severity	Effort	PXL
1	Heavy third-party script load The homepage loads 63 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
2	Product pages lack visible reviews Product pages show a reviews heading but no actual review content, ratings, or social proof, undermining...	High	Low	4/10
3	No guarantee or return policy Product pages lack shipping, return, or guarantee messaging near the purchase path, reducing trust at the...	Medium	Medium	4/10
4	Shipping threshold not prominent The free shipping threshold is buried in page copy rather than surfaced near prices or CTAs, so visitors may...	Medium	Low	4/10
5	Late fee disclosure on product pages Product pages show prices but no shipping or fee information near the price, leaving cost details to be...	Medium	Medium	4/10
6	Email form lacks visible labels Email input fields lack visible labels, causing user confusion about what information is required.	Medium	Low	3/10
7	Trust signals absent from collection Collection page lacks any review, rating, or credibility indicators, offering no social proof while users...	Medium	Medium	3/10
8	Price context missing on collection Collection page lists prices without indicating which items are on sale or the regular price, reducing...	Low	Medium	3/10
9	Controls without accessible names 41 of 79 buttons expose no text label, so screen readers and voice control cannot address them and the...	High	Low	2/10

#	Finding	Severity	Effort	PXL
10	Images missing alternative text 3 of 43 images carry no alt attribute, losing both assistive technology support and the image-search traffic...	Medium	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
